

Enveedo's All-In-One Strategy Execution Platform for Security

Helping businesses achieve continuous cyber resiliency

Cyber resiliency is not an option, it's a necessity

As a component of your modern organization, cybersecurity is crucial for protecting your organization's systems and sensitive data from cyber threats.

Building and maintaining an effective cybersecurity strategy begins with an understanding of the risks you face – and which pose the most danger. This requires a view of all areas of IT and operational risk across your organization. But you can't protect what you can't see. For many organizations, siloed applications, assets, and data stores restrict this view.

Enveedo makes it easier to achieve continuous cyber resiliency.

Enveedo Is Your Single Source

For Integrated Risk Management

- 1 Encourages** participation from key internal stakeholders and reinforces their understanding of cybersecurity- business alignment.
- 2 Delivers** continuous real-time visibility into your cybersecurity risk posture and exposure.
- 3 Facilitates** your development of an effective action plan and enables you to track milestones to completion.
- 4 Enables** seamless management of technology performance and third-party vendors.
- 5 Provides** on-demand access to the Enveedo vCISO Concierge and Customer Success team of experts.

Enveedo guides you in the process to continuous protection

The intuitive and flexible Enveedo platform is designed to adapt to your organization's specific needs. Our unique all-in-one platform approach to integrated risk management guides you through the process of planning, executing, and evolving a cybersecurity strategy to achieve continuous cyber resilience:

1. ONBOARDING

Create your business profile and connect core systems to kick off your program.

2. UNDERSTAND

Identify your Crown Jewels, finish systems integrations, and understand your current security posture via the platform's Risk Assessment and Risk Register.

3. PLAN

Get one-on-one guidance from a consultation with an Enveedo CISO Concierge and plan your 30-/60-/90-day roadmap development based on the results of your Enveedo Risk Assessment.

4. EXECUTE

Implement your program using the platform's Workflow Management capabilities that support you and your team. The platform also allows you to keep an eye on important task assignments and their status via real-time reporting.

5. EVOLVE

Continuously take your security posture to the next level with continuous monitoring and improvements that adapt your security to changes to your IT infrastructure, regulatory requirements, the threat landscape, and the business itself.

We've got you covered with these advantages

The Enveedo platform enables your business to achieve cyber resiliency with a comprehensive – and affordable – subscription platform that covers you throughout the entire cybersecurity lifecycle.

INTEGRATIONS

Our platform seamlessly integrates with your technology stack. Critical information is ingested into our centralized SaaS platform, including asset status, vulnerabilities, and other potential risks related to your business systems.

BUSINESS RISK PROFILE

Context is crucial in cybersecurity risk management, and it varies based on your business objectives, size, industry, and geography. The platform guides you through the process of developing a business risk profile to quickly identify vital information about your most critical business assets (Crown Jewels), the most dangerous attack vectors, your current risk exposure, and more.

CONTINUOUS RISK ASSESSMENT

Manage risks by continuously assessing their status through the Enveedo unified risk register. Identify and develop mitigation plans for program gaps, technical vulnerabilities, and continuously track improvements to your organization's security maturity and performance in real time.

COMPREHENSIVE SECURITY ROADMAP

Enveedo designs a comprehensive security roadmap. You'll be able to assign business impact to tasks and send those tasks to resolution owners. In addition, you can determine how to integrate additional security tools, services, and expertise into your program. Compliance frameworks are mapped to security controls and roadmaps.

DASHBOARDS AND REPORTING

Quickly understand what matters most to all levels of your organization. Easily answer questions about security performance and exposures, control gaps, resolution timelines, and how your technology investments are paying off.

ACHIEVING CYBER RESILIENCY

Building and maintaining cyber resiliency is a continuous process that requires constant effort and participation by all stakeholders in your business. Our platform simplifies the challenging task of maintaining your security posture and ensures that your business is continuously ready to adapt to changes in IT infrastructure, your business, and to an ever-evolving threat landscape.

SMART MARKETPLACE

With a curated marketplace of trusted vendors that are vetted and compatible with the Enveedo platform, you can access expert guidance on the tools and services to help you where you need it most.
